Portfolio: portfolio-nisuradulwan.vercel.app

PROFESSIONAL SUMMARY

Software Engineering undergraduate with hands-on experience in developing web, mobile, and desktop applications through academic and personal projects. Skilled in Java, Python, Flutter, HTML, CSS, JavaScript, MySQL, GitHub, and Figma, with a strong understanding of object-oriented programming and software development principles. Passionate about learning new technologies and seeking a Software Engineering Internship to gain industry experience while contributing to meaningful projects.

TECHNICAL SKILLS

- Languages: Java, Python, Flutter, JavaScript
- Web Development: HTML, CSS
- Databases: MySQL
- Version Control: GitHub
- Project Management: ClickUp
- Tools: VS Code, Figma, IntelliJ IDEA
- Software Development: Object-Oriented Programming, Data Structures

PROJECTS

Personal Portfolio Website |

2026

- Designed and developed a responsive personal portfolio website to showcase projects, technical skills, and academic achievements.
- Created user-friendly layouts and responsive web pages for desktop and mobile devices.
- Technologies Used: **HTML, CSS, JavaScript**
- GitHub: <https://portfolio-nisuradulwan.vercel.app/>

Highway Bus E-Ticketing System

2026

- project is a Highway Bus E-Ticketing System called LankaGo. It is a mobile application developed to digitize Sri Lanka's traditional highway bus ticketing system. The application allows passengers to search bus routes, check seat availability, book tickets, make digital payments, receive QR-based e-tickets, and view their travel history.
- Designed and developed the frontend using Flutter and Dart.
- Created UI/UX designs in Figma for application screens and user flow.
- Designed social media marketing posts to support product promotion and branding.
- Technologies Used: **Flutter, Dart**
- GitHub: <https://github.com/Nimuthu2004/LankaBus>

Traffic Data Analysis System

2024

- Developed a Python-based traffic data analysis system with a graphical user interface (GUI) to analyze and visualize traffic-related datasets.

- Implemented file handling features to read and process traffic data from external files efficiently.
- Technologies Used: **Python**
- GitHub: <https://github.com/nisuradulwan/TrafficDataAnalysisSystem>

Directed Graph Acyclicity Checker

2026

- Developed a graph-based application to detect cycles in directed graphs using data structures and algorithms.
- Implemented graph parsing, cycle detection, sink elimination algorithm, and file handling.
- Applied Big-O analysis to evaluate algorithm performance.
- Technologies Used: **Java, Data Structures & Algorithms**
- GitHub: <https://github.com/nisuradulwan/AcyclicGraphChecker>

EDUCATION

BEng (Hons) Software Engineering

Informatics Institute of Technology (IIT), University of Westminster | 2024–2028

G.C.E. Advanced Level– Mathematics Stream

Mahinda College Galle| 2020–2022

Combined Mathematics– S

Physics– S

Chemistry– S

ACHIEVEMENTS

- Python for Beginners -University of Moratuwa OLP (Verification Code: rLCcjF9Fgy)
- Full stack Developer Certification at University of Moratuwa OLP (2026-ongoing)
- English short course certificate Open University of Sri Lanka.
- special program “Tertiary Education through Career Guidance” conducted in collaboration with the Ministry of Education.

EXTRA-CURRICULAR

Football

swimming

cricket
